

# ANSWERS TO THE TOP 4 QUESTIONS FOR FUTURE MAT<sup>2</sup> NETWORK COMPANIES

The skills gap is widening.

The MAT<sup>2</sup> Apprenticeship Program helps you close it.

### WHO DOES THE MAT<sup>2</sup> APPRENTICESHIP PROGRAM SERVE?

Focused exclusively on high-tech manufacturers and companies with complex technologies or logistics, the MAT<sup>2</sup> Apprenticeship Program closes the skills gap helping companies develop a sustainable pipeline of highly-skilled talent. The program is open to any company with operations in Michigan, and is not exclusive to German-owned companies.

## **HOW DOES THE PROGRAM WORK?**

The MAT<sup>2</sup> Apprenticeship Program team assists with the recruitment of apprentices, helps develop the customized company training plans, facilitates "Train the Trainer" programs and administers the MAT<sup>2</sup> Apprenticeship Program exams.

The MAT<sup>2</sup> Network Company selects and hires the apprentice: an apprentice is an employee. The MAT<sup>2</sup> Network Company then invests in the apprentice by providing an hourly wage, tuition for an associate degree, and stipend while the apprentice is in class.

The MAT<sup>2</sup> Apprentice is expected to pass the applicable college entrance exam, take the college courses that align with their apprenticeship program and pass their exams. Each apprentice will divide his or her time between the college and the company. At the end of the program, the MAT<sup>2</sup> Apprentice has earned an associate degree and is fully integrated into their MAT<sup>2</sup> Network Company.

# WHAT FINANCIAL INVESTMENT DO MAT<sup>2</sup> NETWORK COMPANIES MAKE IN THEIR APPRENTICES?

The typical investment is only \$30,000 to \$35,000 per apprentice per year, including wages, stipend, tuition and fees.

### HOW DO I ENSURE A RETURN ON MY INVESTMENT?

MAT<sup>2</sup> Network Companies can require a 2-year employment commitment after completion of the apprenticeship. In fact, this commitment helps recruit good candidates! Independent of the 2-year requirement, the investment into the apprentice creates an exceptional sense of loyalty towards the employer.
